4917 Demontluzin Street Unit A New Orleans, LA 70122

EXPERIENCE

Senior Software Developer

CompTIA

10/2019 - 01/2025 Remote

- Developed interactive, performance-based simulation exams for over 18 CompTIA certifications, including A+, Network+, Security+, Cloud+, Linux+, Server+, CySA+, PenTest+, CASP+, Data+, and Project+ using PunyJS (a proprietary JavaScript framework like React)
- Built realistic, browser-based certification labs simulating real-world IT environments to enhance candidate readiness and engagement
- Collaborated with subject-matter experts and curriculum teams to ensure technical accuracy and usability across multiple assessment types
- Trained and mentored my successor on the application before transitioning to the Innovation Team
- Transitioned from long-term consultant to full-time employee
- Supported development of the assessment pilot program and video-guided labs
- Both applications used a React + TypeScript frontend and a C# Web API backend, with SQL Server, Neo4J, and Azure Blob Storage as data repositories

Senior Programmer

Surge/Catalyte

10/2016 - 03/2024 New Orleans, LA (Remote)

- Rewrote the applicant intake process for DMV software in 30+ states using ASP.NET and WCF web services, enhancing data security and compliance with law enforcement
- Enhanced and maintained a large-scale ASP.NET MVC web application for Medicaid processing, improving data validation and compliance workflows
- Updated legacy Python scripts for improved reporting on approvals, denials, and fraud cases in healthcare processes
- Managed deployments, sprint planning, and source control processes, ensuring seamless software development lifecycle
- Revamped thermal profiling software for ECD using WPF and Entity Framework, modernizing UI and enhancing performance for electronics manufacturing analysis

SUMMARY

Lead Developer with 20+ years of experience designing, building, and scaling modern web applications. Specialized in modern web development with a proven ability to lead cross-functional teams, modernize legacy systems, and mentor developers across all experience levels. Experienced in enterprise, government, and healthcare projects, with a strong track record of delivering scalable software and cultivating growth-oriented engineering environments.

SKILLS

Agile Ajax ASP.NET Azure

ASP MVC Bootstrap C#

Crystal Reports CSS

Entity Framework GitHub HTML

JavaScript jQuery JQuery Mobile

Linux Microsoft SQL Server MVC

Neo4j OOP Oracle React

EXPERIENCE

Senior Programmer / Technical Lead

PEC Premier Safety

📅 03/2014 - 10/2016 📍 Mandeville, LA

- Led requirements gathering and documentation efforts
- Developed and maintained ASP.NET with C# applications including Standard Safety Questionnaire (<https://www.pecdata.com/SSQV4/Login.aspx>), Advanced Training Tracker and PEC Card (<https://www.pectraining.com/Card/Lookup.Mobile.aspx>)
- Improved database maintenance and migration by establishing standard practices for scripting and SQL error handling, leveraging Visual Studio SQL Server Data Tools (SSDT) and database projects—resulting in fewer deployment errors and faster, more reliable releases
- Redesigned parts of the Standard Safety Questionnaire (SSQ) interface using Bootstrap and Telerik
- Worked on the rewrite of the 10-year-old SSQ legacy system. The rewrite was in ASP.NET MVC and Web API

USDA - IT Specialist

National Finance Center

📅 06/2011 - 03/2014 📍 New Orleans, LA

- Led requirements gathering, development, and management of a five-person team for the Pre-existing Condition Insurance Program (PCIP)
- Rewrote daily batch jobs as batch files and SQL scripts, cutting the run time from hours to less than 5 minutes
- Developed the State-to-Federal application, a C# .NET 4.0 Windows application, for transitioning active enrollees from state PCIP programs to the federally run program
- Ingested XML files from each state and loaded data into the system, transitioning over 50,000 enrollees to the federal system
- Developed a mobile-friendly web application for the Employee Personal Page (EPP) using Microsoft MVC 2, jQuery Mobile, and Oracle
- This application is used by over 750,000 federal employees to check employee information such as earnings and leave, health insurance, and 401k contributions

Software Engineer

Senet International

📅 01/2011 - 06/2011 📍 New Orleans, United States

- Web applications developer for the Pre-existing Condition Insurance Plan. Job duties included .NET web development, code transition, SQL review, and maintenance of www.pcip.gov

Analyst III

Entergy Services Inc

📅 04/2010 - 01/2011 📍 New Orleans, Louisiana

- Cost Analyst for the Project Management and Construction department
- Responsibilities included requirements gathering and monthly budget reporting

VOLUNTEERING

Speaker

2025 Operation Spark

📅 2025 📍 New Orleans, United States

- As an invited speaker for Operation Spark's graduate series, I shared my professional journey
- Discussed the challenges I faced entering the tech industry
- Offered practical advice to bootcamp graduates transitioning into the workforce

Presenter

Longleaf Elementary School

📅 2016 📍 Hattiesburg, United States

Led two programming workshops at elementary school, engaging 75+ students.

- 'My Robotic Friends': Teams programmed a peer acting as robot.
- 'HTML, CSS, JS Crash Course': Students built web pages using Chromebook and JS Bin.

Volunteer

Teen Tech Day

📅 2013 - 2015 📍 New Orleans, United States

- Ed for this annual youth outreach event for three years: presented the first two years, supported logistics the third
- Led interactive sessions on programming fundamentals aimed at inspiring New Orleans youth (ages 13-18) to pursue careers in tech

Presenter

USDA

📅 2013 📍 New Orleans, United States

Presented ".NET Basics & OOP for Mainframe Developers" for USDA training. Aided COBOL developers' transition to .NET with foundational OOP concepts.

EXPERIENCE

Experienced Consultant II

Diamond Data Systems

📅 03/2006 - 03/2010 📍 New Orleans, LA

- Served as lead developer for the Electronic Health Record system for LSU Health and Sciences Center
- Redesigned the SQL Server 2005 backend for the application
- Provided Louisiana Department of Health and Hospitals with detailed functional design documents for the Points of Dispensing (POD) emergency application
- Served as lead developer for the rewrite of the House Staff Resident Tracking application for Ochsner's Graduate Medical Education Department
- Converted the application from a Visual Basic 6 Windows application to an ASP.NET 2.0 web application with an Oracle backend
- Converted the Louisiana Protective Order Registry (LPOR) application from Oracle Forms to a web-based VB.NET application for the Judicial Administrator's Office of the Louisiana Supreme Court
- Created and implemented reports using Microsoft Reporting Services
- Developed the ASP.NET Cemetery & Funeral Home Enabler (CAFÉ) application for Stewart Enterprises
- Created and redesigned Crystal reports for this application
- Developed multiple components for the Logistics and Revenue Service (LARS) system for Hornbeck Offshore Services, LLC
- Developed and designed the Vessel Specifications module of this system, which allowed users to maintain up-to-date information for the entire Hornbeck fleet

Application Developer / Technical Support

Service Management Group (SMG)

📅 06/2004 - 03/2006 📍 Hattiesburg, MS

- Developed a classic ASP application that helped users build SQL queries and custom reports
- This application was used by 20 leading manufacturers in the food service industry
- This tool allowed manufacturers to track warranty claims
- Implemented an ASP.NET task management system for Forrest General Hospital
- This application was used to track doctor and staff requests, complaints, and suggestions
- Designed, developed, and maintained an HTML parser written in VB.NET
- This application was used internally to create online parts manuals for food service companies
- Provided technical support for the Electronic Manual (EMCD) system
- The system was a CD-based electronic information reader and search tool

EDUCATION

Computer Science

University of Southern Mississippi

📅 08/2001 - 12/2004 📍 Hattiesburg, Mississippi

- Bachelor of Science
- University of Southern Mississippi, Hattiesburg, Mississippi
